PROFESSIONAL SUMMARY

Software Engineer with 1.3 years of internship experience in Full Stack Development and AI-powered applications. Skilled in React, Next.js, Node.js, Express.js, MongoDB, Redis, REST APIs, and LLM integration. Passionate about building scalable web applications and AI-driven products.

EDUCATION

Narula Institute of Technology

B.Tech, Computer Science and Engineering - 8.60 CGPA

Kolkata, West Bengal, India

July 2022 - July 2026

PVSS DAV Public School

Higher Secondary School Certificate (XIIth) - 76.50%

India

May 2020

PVSS DAV Public School

Secondary School Certificate (Xth) - 77.50%

India

May 2018

TECHNICAL SKILLS

Languages: Java, JavaScript, Python, SQL

Frontend: HTML, CSS, React, Next.js, Tailwind CSS

Backend: Node.js, Express.js, MongoDB, Redis

Tools & Other Skills: Git, GitHub, Docker, REST API, Prompt Engineering, AI Tools, Vercel, Render, Postman, Problem Solving

WORK EXPERIENCE

AI Intern

CodeApto

Aug 2025 - Feb 2026

- Designed AyurGyaani, an agent-based AI Ayurvedic assistant enabling natural language symptom understanding and personalized herbal guidance across 100+ herb categories.
- Leveraged Claude and Cursor AI across the agent development lifecycle including prompt design, iteration, and debugging to accelerate feature delivery for AyurGyaani.

Frontend Developer Intern

CodeApto

Jul 2024 - Jan 2025

- Built and optimized a modern, responsive frontend for ElevateBPM using React 18 and Framer Motion, improving SEO by 8% and performance by 11% through efficient rendering strategies.
- Delivered seamless backend API integration and smooth animations across all devices, enhancing overall user engagement.

PROJECTS

AyurSaathi | React.js, Next.js, JavaScript, Tailwind CSS, MongoDB, Redis, Gemini API

- Built AyurSaathi, an end-to-end traceability platform ensuring tamper-proof tracking of Ayurvedic herbs across 5 supply-chain stages, from geo-tagged collection to consumer-verified QR labeling.
- Designed and implemented admin and stakeholder dashboards supporting 3 distinct user roles, enabling role-based access control across 100+ herb batch records.

LeafIQ | React.js, Next.js, Node.js, Express.js, MongoDB, TensorFlow, Gemini API

- Developed an AI-powered crop disease detection platform using Next.js, Node.js, TensorFlow.js, and Google Gemini AI, enabling real-time diagnosis across 14 crop species and 39 disease classes with 96.4% accuracy.
- Integrated a deep learning CNN model trained on the PlantVillage dataset with a Node.js REST API, delivering disease predictions in under 5-10 seconds along with AI-generated treatment recommendations.
- Designed a responsive, farmer-friendly web application implementing image upload, real-time inference, and intelligent crop management suggestions to improve early disease detection and reduce crop losses.
